For the Club:

Clean and disinfect bathrooms regularly, particularly high-touch surfaces, and ensure they have handwashing supplies. These EPA-registered household disinfectants are recommended by the CDC for cleaning.

Adapt practices to allow social distancing of at least 6 feet from others, except for members of the same household.

For example, facilities should limit capacity

“Household” means all the people living in the same home or residence, including a shared rental unit or other similar living space.

Just as facilities need to ensure that customers are following social distancing while on the premises, employees of the facilities also need to follow social distancing. This means maintaining a physical distance of at least 6 feet between individuals. This distancing for employees should occur both inside buildings and outside, such as on golf courses, trails, boat launches, and other outdoor settings.

Ensure that employees and customers have access to handwashing/hand sanitizing facilities and supplies.

Outdoor events such as tournaments, leagues, competitions or practices may be held if they are modified as described below.

The event does not involve gathering of groups of more than 10 people,

Participants maintain social distancing throughout the event,

Spectators are prohibited.

To protect one another, Minnesotans are strongly urged to wear a manufactured or homemade cloth face covering when they leave their homes and travel to any public setting where other social distancing measures are difficult to maintain (g., indoor spaces like grocery stores), and to follow face covering guidelines issued by MDH (MDH Guidance on When to Wear a Mask) and the CDC. Note that cloth face coverings may help protect others from the wearer’s respiratory droplets but are NOT a replacement for social distancing. Social distancing must be observed even if face coverings are in use.

For the Public:

Consistent with state and federal guidance to limit the spread of COVID-19 and protect our neighbors, EO 20-56 discourages Minnesotans from unnecessary travel. If travel is necessary to engage in authorized outdoor recreation, the following will help you minimize potential points of virus transmission:

Travel as directly to your destination as possible and minimize stops along the way.

Attempt to bring all needed supplies with you.

If you do need to stop for gas or supplies, wear a manufactured or homemade cloth face covering.

Wash your hands or use hand sanitizer after touching common surfaces (gas pumps, door handles, shared bathrooms, etc.).

Do not travel if sick.

Anyone with symptoms consistent with COVID-19 (including fever, cough, or difficulty breathing) should stay home and not engage in outdoor activities. For more information see CDC's What to Do If You Are Sick and the State of Minnesota's Self-Screening Tool .
